## UNSERE MISSION: QUALITÄT

Den Wert eines Unternehmens erkennt man an den Früchten, die es erntet - und zwar an deren Menge und Qualität gleichermaßen. Leistung und Langlebigkeit unserer Produkte und die Zufriedenheit unserer Kunden bilden den Grundstein unserer Unternehmensphilosophie. Aus diesem Grund setzen wir bewusst auf kontinuierliche Spezialisierung – und wir sind überzeugt, damit die richtige Wahl für die Produktion von Holzfensterläden für Drittfirmen getroffen zu haben.

Als führendes Unternehmen unseres Sektors sind wir Ihr zuverlässiger Partner und garantieren seriöse Arbeit, Kompetenz, Pünktlichkeit und Qualität.

**NARDELLI. WIR LIEBEN DIE NATUR.**

# HOLZ

## EIN GESCHENK DER NATUR

Holz ist das Grundelement unserer gesamten Arbeit.

Tanne, Kiefer, Kastanie, Fichte, Meranti-, Lärchen- und Eichenschichtholz: Hochwertige Hölzer, die in eigenen Öfen künstlich getrocknet werden. Durch die automatisierte maschinelle Selektion werden Mängel wie Knoten, Harzeinlagerungen oder Unschönheiten restlos beseitigt - denn für unsere Fensterläden verwenden wir ausschließlich bestes Rohmaterial

**NARDELLI. VOR ALLEM FENSTERLÄDEN.**

# TECHNIK

## VERARBEITUNG

Der Verarbeitungsprozess ist grundlegend für hochwertige Ergebnisse und absolute Perfektion.

Die Profile unserer Fensterläden werden mit rechnergesteuerten Maschinen zugeschnitten: So erreicht die Imprägnierung bei der Beizung auch die am schwersten zugänglichen Teile des Fensterladens.

Die abgerundeten Kanten sorgen für eine unterbrechungsfreie Beschichtung und ermöglichen damit ein dauerhaft ausgezeichnetes Ergebnis.

Jedes Element ist außerdem mit einem RFID-Chip versehen, der die Rückverfolgung bei Verarbeitung und Einsatz des fertigen Produkts ermöglicht.

# PRODUKTE

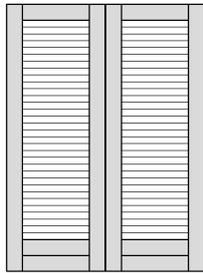

NARDELLI. FENSTERLÄDEN AUF EROBERUNGSZUG.

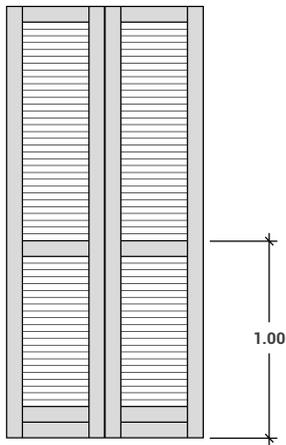

# DIE RICHTIGE LÖSUNG FÜR JEDEN BEDARF

Nardelli bietet eine breite Auswahl an Modellen,  
vom klassischen bis hin zum modernsten Design.  
Jede einzelne unserer Lösungen  
ist dem baulichen und landschaftlichen Kontext  
neuer oder renovierter Gebäude optimal angepasst.
